

STANDARD BLUE II & WHITE II

Product Description:

This classic product has been reengineered with a new ageing resistance acrylic adhesive and is made from the latest generation 0,85mm PE foam, making it a more durable and reliable pad than its predecessor.

Originally developed for mineral lenses this is an excellent general-purpose pad and can be used in with any existing lens edger. Can also be supplied with green or white liner if required.

The Standard Blue & White Blocking Pad Version II is suitable for hydrophobic lenses and some super hydrophobic lenses, making it a versatile and useful tool for a wide range of optical applications

Directions for use:

Before use, make sure lens and block are free of moist, dust and grease.

Physical Properties:

Adhesive	Acrylic
Carrier	High conformable closed cell PE foam 0,85mm (+/- 15%)
Total thickness	0,85 mm
Liner Manual roll	Top, White glassine paper or blue PE Bottom, white glassine paper
Liner Machine roll	Top, translucent blue PE film Bottom, transparent PET film
Temperature resistance	-40°C up to 100°C
Shelf Life	12 months from dispatch when stored in original cartons between 10°C to 35°C and under 50% relative humidity

All standard shapes are available, and custom shapes can be provided upon request. Please visit our website for a list of standard shapes.

Data and detail in this sheet were correct and up-to-date at the time of printing and are intended to provide information on our products and their possible applications. This sheet is not a specification and does not assure specific product characteristics or make reference to the suitability of the products for a definite application. Because Permanento cannot anticipate or control every application, we strongly recommend testing of this product under individual application conditions. In according with our policy of continuous improvement specifications may vary.
